

SWING THING

The Swing Thing coaster gives riders of all ages a unique and smooth flying sensation. As riders, with feet dangling, swing from front-to-back and side-to-side around turns, over hills, and down drops, making this coaster unlike any other. The award-winning Swing Thing provides a dampened experience that eliminates the jerks and pops of normal suspended coasters.

SWING IN 4 DIRECTIONS

Bogie design provides exclusive front-to-back and side-to-side articulation for added thrill and unique experiences

TOTAL IMMERSION

Increase the experience by coasting above water features or other attractions of your choice with custom layouts.

GIVE RIDERS CONTROL

Lever and water-bomb design enables riders to bomb **when** they want, and **how much** they want.

CUSTOM THEMING

Adequate weight allowance enables parks to custom-theme the ride vehicle. For example: bogie covers, canopies, special seats, & seat backs

MAKE IT RAIN

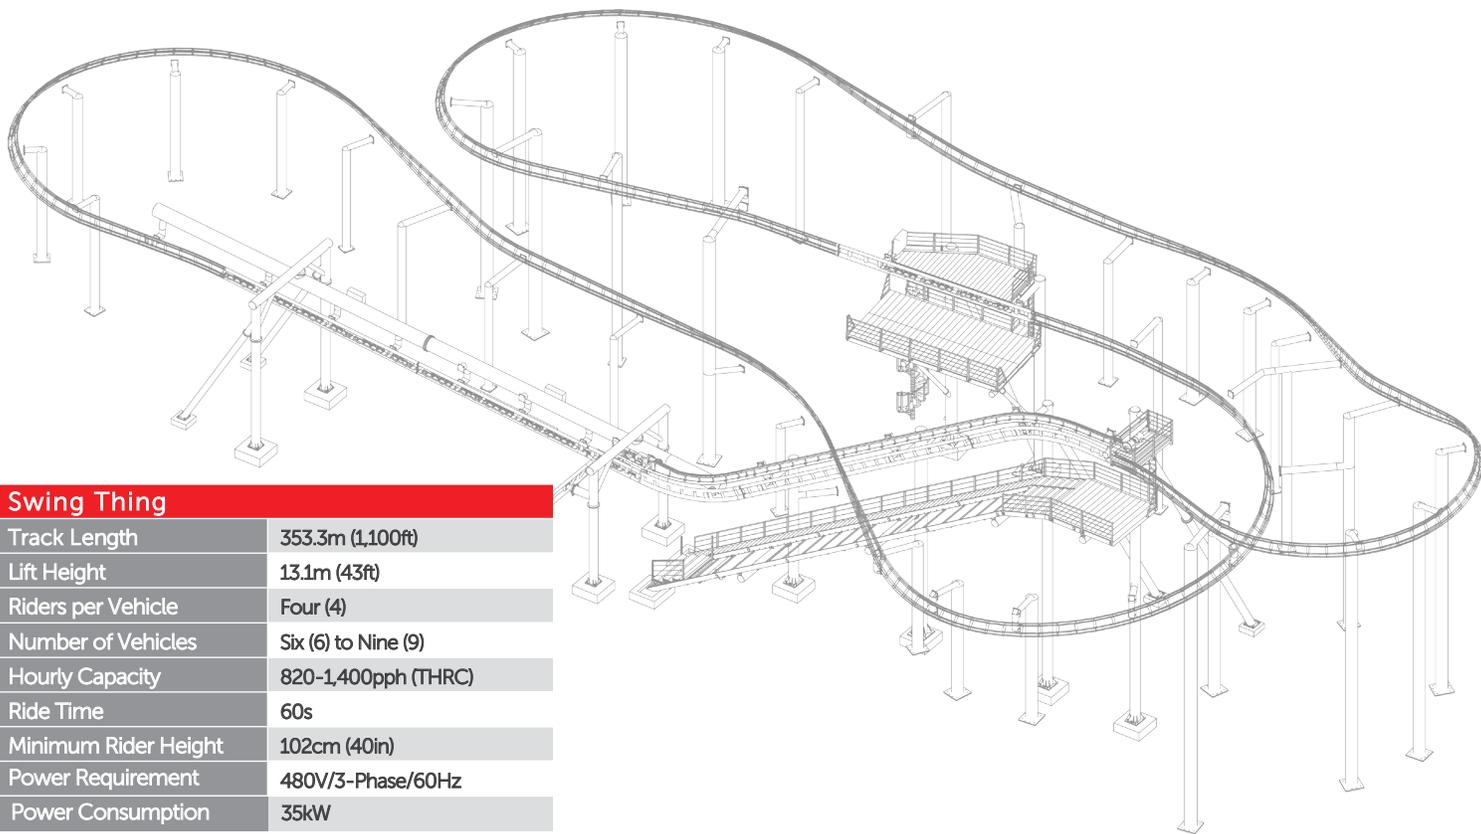

Water-bombing feature provides riders with up to 19 L (5 g) of water to be used throughout the ride. It only takes 20 seconds to re-fill

INCREASED AUDIENCE

Supports 1.02-m (40-in) Minimum Passenger Height. Offers exciting experiences for every age group
